

KERATIN STRAIGHTENING – CARE SHEET

Thank you for choosing to have keratin straightening at Delilah. Below is a list to help you maintain your keratin treatment and get the most out of it.

* DO NOT shampoo or condition the hair for 48 hours after the keratin treatment has been applied.

* When it comes time to shampoo and condition, please use products that are **sulphate free**. (premium quality shampoo's and conditioner's are available to purchase at the studio)

* DO NOT tie your hair back, use pins or clips or wear glasses on top of your head for 48 hours.

* Colouring your hair is ok. It is recommended to colour your hair before you have the treatment, even on the day is ok, but if your wanting to colour your hair afterwards, waiting 2 weeks is necessary.

* The life of your keratin treatment is between 4 and 6 months (sometimes even longer), but it is ok to do the treatment every 4 weeks or as necessary.

* Protecting your hair against the elements and lifestyle will extend the life of your keratin treatment (eg, chlorine, sun exposure ect).
